WE BLEED GREEN

ARCTIC CAT RIDERS SHARE A PASSION LIKE NO OTHER. Explorers who just need a trail, their favorite set of wheels and a few friends. They can tell you a story or two about why riding is good for the soul — and why it's in their blood.

“Arctic Cat is adventure. I have had a Wildcat 1000X and now a Wildcat XX, and between these two vehicles, I have gone around 10,000 miles. I love both platforms and I look forward to seeing what's coming out next to the lineup.”

➤ **-Mike Smiddy**

➤ **“When I got my first Arctic Cat, I was 16 again, not the 48 I really was.** I saw the freedom it could bring me, the places I could go with my wife, and the time we could spend exploring together. Now some things have changed, but we still love our Arctic Cats. Depending on our mood and who is along with us, we can accommodate a lot between our two vehicles.”

-Larry Rose

➤ **“I have raced in the Texas Outlaw Series and the MidAmerica Outdoors in the women's amateur class since February of 2021.** My dad, brother and I all work on my buggy to make sure it's race-ready. There's a lot of hustle that goes on behind the scenes, and we're just normal people. We don't have a huge crew to help work on things. I took 2nd place overall in the women's amateur class in my first year of racing, and I'm so proud to show everyone how awesome my Arctic Cat actually is!”

-Holly Mulligan

“What does Arctic Cat mean to me? It's family! This brand stands on its own legacy for this reason alone. I have been in all types of motorsports from racing to showing and never have I come across a brand that stands more firmly on family values. That's why I'll bleed green for life!”

-Jeremy Lau

➤ **“The places we have seen and the people we have met are because of Arctic Cat.** You can't beat the goosebumps you get from climbing in for a good ride, and I've met people out on the trails that I'm sure will be lifelong friends. My wife and I get more quality time together — we just purchased our first Wildcat XX and absolutely love it. Family by choice!”

-Chris Holman

“I got into riding because of my dad. He drove dirt bikes all his life, and then got into off-roading. Before I was born, he began suffering from short term memory loss, but he still remembers the thrill of riding. When we are off-roading in our Arctic Cat, it's like nothing ever happened to him. It's a great way to bond, and it brings him back to a place he will never physically or mentally be again.”

-Nicholas Ruiz
